

## **Terri Austin listens to us.**

She shares our concerns — good jobs, quality education, affordable health care, fair taxes. As our state representative, Terri meets with hundreds of residents each year at events throughout our community. She knows people want government to work in an effective and efficient manner, and she believes that's not too much to ask.

## **Creating Stable, Good-Paying Jobs**

Terri Austin has a proven track record in working with local and state leaders to create new jobs and economic development opportunities. She's excited about the arrival of Nestle, the expansion at Hoosier Park and the activities at the Flagship Enterprise Center. Terri knows there is much more to be done, and she will make sure state government continues to make economic development a priority in our district.

## **Helping Students and Workers**

A lifelong educator, Terri Austin knows our students and working adults must remain competitive in the global economy. Terri has supported legislation to increase funding for our local schools, expand full-day kindergarten programs and provide additional training opportunities for those already in the workplace. Terri will continue to explore innovative ways to provide everyone with the best education and training available.

## **Improving Our Quality of Life**

Terri Austin voted in favor of a reform package that provided more than \$870 million in immediate property tax relief to homeowners and legislation that is helping 1 30,000 uninsured Hoosiers get better access to quality health care. She is working to cut wasteful spending and unnecessary red tape in government while making sure that Hoosiers continue to receive essential services.
